

2. Bio-sourced materials or materials made from recycled materials

The use of biosourced materials or materials from reuse is highly valued in new construction, thanks to RE2020, which emphasizes both the carbon footprint of buildings and their energy performance. In addition, numerous labels—Cradle to Cradle, Label Biosourcés, etc.—promote and codify reuse and biosourced materials, seen as virtuous solutions for the planet.

Hall 1 – Batimat

- **REFAB Floorboards - Artépy**
Floorboards made from recycled plastic.
Stand : H1-D081
- **Piano Acoustic Panel - Home International**
Panel made from recycled plastic bottles.
Stand : H1-H087
- **MClay Wall Coating - Microcrete**
Clay-based wall coating.
Stand : H1-D076
- **STONEPANEL Exterior Wall Panel - CUPA STONE**
Natural stone panel for exterior walls.
Stand : H1-B084
- **Biofib' Hemp Insulation - Biofib Isolation**
Hemp-based insulation.
Stand : H1-P102
- **Lanaé Glass Wool - Saint-Gobain ISOVER**
Insulation made with 50% recycled glass and a biosourced binder.
Stand : H1-F054
- **STYLE Blown Insulation - SEMIN SAS**
Insulation made from recycled textile fibers.
Stand : H1-L066
- **Reusable Porcelain Tiles - SARL TIZIRI CERAMICA**
Premium porcelain tiles that can be reused after careful dismantling.
Stand : H1-K028
- **Natural Stones - CUPA STONE**
More than 500 references of reusable natural stones.
Stand : H1-B084

IPAC® Self-Supporting Products - BAT'IPAC

- Panels made from 100% recycled and recyclable cardboard.
Stand : H1-R096

Modular Bungalows - AQUIBALAT

- Modular and reusable structures.
Stand : H1-L020

NPS FLEX® Composite Solution - Tecnostrutture Srl

- Steel-concrete solution designed to be dismantled and reused.
Stand : H1-W094 (Construction Tech)

Reusable Prefabricated Bathrooms - Baudet

- Design and manufacture of reusable prefabricated bathrooms.
Stand : H1-N028

Comprehensive Circular Economy Solution - CYCLE UP

- Solution for reusing construction materials via a marketplace.
Stand : H1-K105

ECOMAISON Eco-Organization

- Collection and recycling of construction materials deposited at construction sites.
Stand : H1-J032

ECOMINERO Eco-Organization

- Collection and recycling of construction materials deposited at construction sites.
Stand : H1-K032

VALOBAT Eco-Organization

- Collection and recycling of construction materials deposited at construction sites.
Stand : H1-J038

Hall 2.2 – Idéobain

Jouvence Vanity Unit - DECOTEC

- Vanity unit made of Solid Surface, a material created from scallop shells.

Stand : H2.2-A072

Hall 4 – Batimat / Equibaie

- **Block Art Panel - Geplast**
Decorative panel made from recycled plastic.
Stand : H4-D058
 - **Aluminum Joinery - Cortizo Aluminium**
Joinery made largely from recycled aluminum.
Stand : H4-F036 (Equibaie)
 - **ORAÉ® Low-Carbon Glass - Saint-Gobain Glass**
Low-carbon glass made largely from recycled glass.
Stand : H4-C070 (Equibaie)
-

Hall 5.3 – Batimat

- **Removable Verandas and Pergolas - ALU-GLASS**
Evolutionary and reusable structures.
Stand : H5/3-B096
-

Hall 6 – Batimat

- **Reusable Control Cabinets - AFCA**
Control cabinets for construction sites.
Stand : H6-D092
-

Hall 7.2 – Batimat

- **TopDalle Eco+ Horizontal Formwork System - Alphi**
Formwork system made from 75% recycled aluminum.
Stand : H7.2-E015
- **Mobile Construction Equipment - Acomat**
Silicone molds and mobile concrete plants for construction sites.
Stand : H7/2-B072
